## What can the cloud do for you?

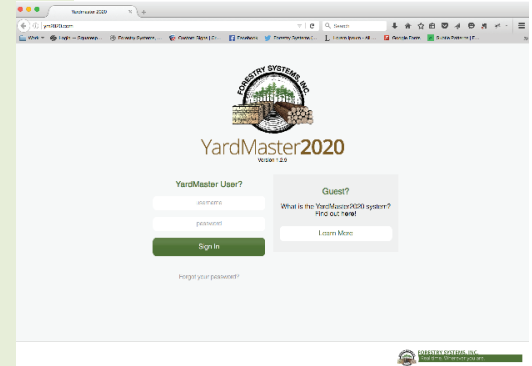

The **YardMaster2020** system is a modern solution for your company's inventory needs. With this system, you can now access your company's data from anywhere. As long as you have an Internet connection, **YardMaster2020** can make any location into your office. Because this system is cloud-based, there are no limitations on number of users, hardware types, or operating system requirements.

Today, many companies are looking at expanding their expense base for technical services by adding additional employees with technical experience. With the **YardMaster2020** system, you no longer have to rely on a technical individual to manage your system. Our cloud-based application provides daily backups, the fastest possible processing speeds, unlimited connectivity, media updates, and immediate technical support.

The system offers many solutions to help your company keep pace in today's busy marketplace. **This system covers almost every aspect of log operation, including, but not limited to: purchasing, inventory control, sawmill consumption, robust reporting, order entry, shipping, and sales.** You no longer have to work around server requirements at your office and you do not have to buy the program more than once per location.

## General System Features

- YardMaster2020 is designed for use with the FSI Logscaler
- Toll Free number for immediate assistance (1-800-868-2559)
- Extensive log inventory and process control with a wide assortment of reports
- Supports bar coding and short and long range scanners
- Inventories: - Tagged or untagged inventories

## Seamless Handheld Integration

**Yardmaster2020 interfaces with our handheld computers for a seamless transfer and processing of data. Handhelds communicate with the host system by:**

- Direct cable connect to a PC serial port
- Wireless real-time data transfer at host site

**The Hydrus offers an ergonomic look and feel.** A 17 key numeric keypad, a 5 megapixel color camera, a 100% water-proof environmentally sealed enclosure, a 40 hour battery life and Windows CE.

The Hydrus

**The Allegro<sup>2</sup> is as rugged as they come!** Which means you'll never have to worry about it letting you down. Designed for all-out data collection, the Allegro 2 features a full QWERTY & numeric keyboard, carefully selected for its ergonomic form.

The Allegro<sup>2</sup>

**Archer<sup>2</sup> is designed for ease and accuracy.** A perfect complement to the YardMaster2020 system. The Archer2 is rugged, waterproof and shock proof, all with an easy to use touchscreen and back-lit keypad allowing for easy set-up.

The Archer<sup>2</sup>

## NEW!

**Mesa 2 an office in ANY ENVIRONMENT!** In a sleek package with the highest-rated protection against water and dust, the Mesa 2 Rugged Tablet can go with you into the log yard and the harshest environments out there.

**NEW!**  
The Mesa<sup>2</sup>

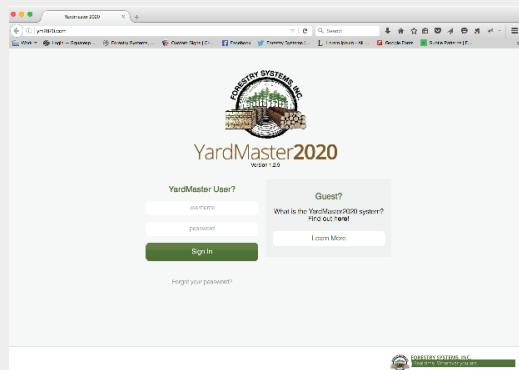

**Transfer log data to the YardMaster2020 system via a wireless signal for real-time data transfer. This ensures you can access your data anywhere, any time when you log into [ym2020.com](http://ym2020.com).**

## Security

As a program utilized by a variety of users, the need and demand for a secure user/company working environment is readily apparent.

Forestry Systems is well aware of your security concerns. We have devoted a large amount of system design time to implement a secure user login and a robust set of user privileges that allow specific users and yards the right to view or change information in our systems depending on the user's/yard's privileges that your company's administrator has designated.

- User password login protection
- Full user privilege control for every function
- Event History available for user accountability.

Login Screen

## Multi-user/Multi-site (LAN/WAN) Security

- User password protected login
  - Your company's systems administrator will setup and maintain a user profile for each employee that accesses the log system.
  - The user profile consists of a security password in order to login to the system and a set of user privileges that allow/deny access to every function of the system.
- Full user privilege control for every function
  - Each user is identified to the system and designated as to which Yard(s) should allow the user access
  - There is a complete breakdown of every function in Yardmaster that details availability of a user to:
    - View/block designated screens
    - Allow/deny editing of data within a screen module
    - Allow users to execute specific operations within a screen module

Main Menu

## Interface with 3rd Party Software & Devices

Import/export file capabilities to and from 3rd party software and production devices

- Yardmaster can export ASCII text files to be loaded into compatible:
  - Accounting software
  - DataBase software
  - Spreadsheet software

- Yardmaster2020 can import ASCII text files generated by production devices:
  - Automated stacking devices
  - Sorters
  - Other devices that can generate compatible file formats.

Import/export files will be created according to specifications agreed upon for compatibility.
